**Writing sample: MIT TECHNOLOGY CHILDREN'S CENTERS**

MIT is one of our best clients, and we usually work with them on multiple projects every year. This project—a website for the MIT child care centers—was a favorite.

**encouraging children to thrive  
in a safe and welcoming child care environment**

At TCC, we understand that every child is a unique individual. The professional child care services we provide offer a balance of imaginative one-on-one and group activities, allowing each child in our care to embark on a personal learning adventure enriched by a mingling of cultures and backgrounds. We work closely with parents and families to nurture the children and create an educational experience that is both exciting and satisfying.

**about TCC**

**a vibrant and supportive learning environment**

The Technology Children's Centers (TCC) provide child care to families of MIT employees and students, as well as to the general community. Our programs are developmentally based, and our centers foster respect and appreciation for individual and cultural diversity.

Surrounded by support and encouragement, each child at TCC can pursue his or her natural curiosity while undertaking age-appropriate activities and challenges. As the children work together with us to build their social and intellectual skills, they also develop independence and confidence.

**a diverse and stimulating community**

At TCC, our staff members are state-certified early childhood professionals dedicated to the education of young children and committed to ensuring each child's safety and wellbeing.

We value the opportunity to develop strong, active partnerships with parents and families to support the children's learning experience. Our community is multicultural, and many of our teachers and families are multilingual, which enhances our programs immensely and encourages the children to learn about and enjoy the rich diversity surrounding them.

## TCC centers

### **education that is responsive, holistic, and individualized**

We offer well-rounded education programs for children aged 8 weeks to 5-6 years. Guided by our skilled and attentive staff, the children explore and learn in safe, comfortable surroundings that inspire intellectual curiosity and invite discovery. Our low teacher turnover and excellent teacher-child ratio ensure that each child experiences the consistent personalized attention and warm relationships that lead to success.

- Each program's curriculum responds to developmental abilities and observed interests; activities include music, art, stories, sensory-motor experiences, make-believe play, care of animals, cooking, and creative projects and games.
- Each of our centers is either accredited by the National Association for the Education of Young Children (NAEYC) or working toward accreditation.
- Parents and families stay involved through daily contact with teachers, volunteer activities, semi-annual conferences, and occasional field trips, workshops, and special events.
- We provide a variety of nutritious morning and afternoon snacks; we also provide milk or water for children to have with snacks, lunches brought from home, and/or throughout the day.
- All TCC staff have been trained in CPR, safety, and first aid.
- TCC staff members meet weekly to exchange ideas and develop program plans. When the need arises, our staff work closely with early childhood specialists, including speech therapists, physical and occupational therapists, play therapists, and other professionals.
